Number 24

The Men's Cash Store

Specials for This Week and Next

In order to reduce our Shoe stock before arrival of fall goods, we will sell the following shoes at the following prices:

- 12 pair Russian Calf, tan color, receding toe, regular price \$18.50 for..... **\$16.50**
 10 pair Vici Kid, black, medium toe, regular price \$18.50 for..... **\$16.50**
 12 pair Russian Calf, color black, receding toe, regular price \$16.75 for..... **\$15.00**

We have a few pair odd shoes on hand, to clear will make special prices; call and see them

C. J. BRAREN

Quality Bread

There is a peculiar something about Barber's Bread that makes it stand out prominently in many homes in this town—it has a tastiness that causes the children and grown ups to marvel at its goodness. The answer is, Quality, and that is because the best wheats and other ingredients of the highest nutrition, combined with modern methods of baking go into every loaf. We serve quite a number of the citizens daily, and we can serve you too. Buy a loaf of our bread today and you will appreciate this. Our cakes and pastries are equally good, and prices are reasonable.

BARBER'S BAKERY

CLARESHOLM LOCAL NEWS

J. B. Boese received a telegram Saturday last announcing the death of his brother at Oshkosh, Wisconsin. He left on Saturday night's train, for Wisconsin.

Chas. Lawrence has taken over Vanhorn's Livery Barn, and will do teaming and draying in connection. He will also take orders for and deliver ice the remainder of the season.

Chas. Rompian and A. E. Quilly have formed a partnership and have taken over the Farmers' Garage. They will do teaming and plumbing; gas engine, tractor, magneto and car repairing.

Mr. Swift of the Inland Revenue Department, has been in town this week, instructing the business firms regarding the excise tax. Somebody's always taking the joy out of life. Damn the Kaiser anyway!

The Calgary Gas Company has begun a campaign for libel against the Calgary Albertan, claiming \$100,000.00 damages on account of statements made by the Albertan in criticism of the Company in its campaign to get higher rates for its gas.

Although the seeding season this year was about a month late the exceptionally favorable growing weather of the past four weeks has brought the grain on so fast that harvest promises to be fully as early as the average in the Clareholm district. The weather at the present time is absolutely ideal.

Church of the Nazaren. Sunday, August 1st, Clareholm; Sunday school at 2 p.m., preaching service 3 p.m., evangelistic service 7:30 p.m. Grammar; Preaching service at 10:30 a.m. Sunday school following this service, preaching service at 8 p.m. Greenbank School House; Sunday school at 2 p.m., preaching service at 3 p.m. are cordially invited.—R. S. Tenove Pastor.

Pendleton, Ore. July 26.—Shot through the breast by one of six prisoners breaking from the county jail, Sheriff T. Taylor, of Umatilla county, died this evening. Six of seven men in the jail overpowered the deputy sheriff and shot Taylor with a revolver which had been concealed in a cell. Poses are pursuing the fugitives.

(Sheriff Taylor was well known to many residents of the Clareholm district who formerly lived in Umatilla county, and who will regret to hear of his tragic death.)

The Review-Advertiser is informed that since the advent of hot weather large numbers of people have been bathing in the water at the intake from which the Clareholm supply for domestic and all other purposes is drawn, notwithstanding the conspicuous warning notices placed at that point. This means that all the water Clareholm people drink is polluted by these bathers. It must be stopped. If the bathers will not for the warning desist from polluting the drinking water supply of the town they must be prosecuted to the full extent of the law. It is surely someone's duty to bring these law-breakers to justice.

How necessary the raise in railway employees' wages, and the resultant higher cost of transportation, we cannot say. But one thing seems certain: the greatly increased cost to the public is going to "kill the goose that lays the golden egg." Motor transportation will be so much cheaper than rail transportation that it will drive the railways off the face of the earth. No other outcome seems possible. The railway employees might as well begin looking for another job right now. The handwriting is so plain that even he who runs may read.

The Resolute won the fourth and fifth races of the series and the yachting trophy remains in the United States. Sir Thomas Lipton announces that he will again be a contender for it next year or the following year.

CYCLONE SWEEPS SASKATCHEWAN

Regina, July 23.—Saskatchewan is assured of a 1920 crop, but at a great cost. Yesterday the province received the rain it has been praying for for weeks. It came in cyclone form, swept the province from west to east, carried with it death to at least two persons, injured over a score and caused property damage estimated at \$250,000.

The severest damage from the cyclone was in the southern parts of the province. At Alameda five people are known to have been injured and nine barns and a school house blown to match-wood. The damage is estimated at \$100,000 here. So great was the velocity that a threshing outfit was carried 200 yards.

Both east and west of this territory the cyclone caused damage. Two women and a baby are dead following the cyclone at Frobisher. Heavy destruction of barns and houses is also reported. At Kroman, nine miles southeast of Regina, there was a washout and trains were stalled.

At Yellowgrass the cyclone blew down a house and sent a man twenty feet in the air. A school house was also destroyed. Hall at Edgley, Edenwold and Avonhurst, an area of 25 miles, cut the grain down as though by a mower and eight hours after the storm the ground was as white from hail as after a winter storm.

A new edition of a map of Manitoba, Saskatchewan and Alberta giving the number of quarter sections available for homestead entry in each township with the boundaries and offices of government land agencies has been issued by the Natural Resources Intelligence Branch of the Department of the Interior. This new edition clearly indicates all railways, forest reserves, parks and Indian reserves, also the land which has been reserved for soldier settlement purposes. The size of the map is 24 1/2 inches and the scale is one mile to one inch. The importance of the new edition at the present time is apparent to prospective settlers, officials of banks, railway companies and land agencies, in fact everyone interested in the development of land in the western provinces. A copy of this publication which is known as the "Small Land Map of Manitoba, Saskatchewan and Alberta," may be obtained by applying to the Superintendent of the Natural Resources Intelligence branch of the Department of the Interior, at Ottawa.

Foothills Lodge No. 13

I. O. O. F.

Meets every Monday evening at 8 o'clock in Odd Fellows' Hall

Visiting Brethren Welcome

E. G. BARBER, N. G.

TRY OUR ICE CREAM

One taste is enough to convince you that it's useless to look elsewhere for its superior. Equals it may chance to have, but superiors, never. We have Ice Cream in all the most delicious flavorings packed in our freezers ready to serve by the plate, pint or gallon.

How much can you use today?

J. B. BOESE

Natural Resources Of Western Canada Untold Value

Sir John Willison, in a speech delivered before the Industrial Club at Halifax, and dealing with the financial outlook for Canada, gave some interesting facts and figures regarding the potential wealth of this Dominion. Speaking particularly of the undeveloped wealth of the western provinces he said in part:

It is established that in Saskatchewan there is clay for earthenware which would afford the raw material for pottery industries. Indeed, according to one of the provincial ministers a company is now producing "first class articles of clay manufacture." A discovery of white clay near James Bay is expected which with large deposits of felspar make it possible for Ontario to manufacture optical glass, fine china and ornamental glassware. But we should have greater knowledge of these clays and that we can only acquire by scientific and industrial research. There is no doubt that the return from the fisheries could be enormously increased. The council for scientific and industrial research estimates the loss in solids, comprising chiefly fat and proteins, in the 30,000 tons of waste that is thrown away annually at \$10,000,000 and in oil at \$2,000,000. These discoveries alone increase the value of the fisheries by 25 per cent. The council is engaged in experiments to determine the commercial feasibility of utilizing as fuel the lignite deposits of the prairie provinces. If these experiments are successful, as they promise to be, not only will industrial development follow, but an annual saving of \$100,000,000 involving, at the present value of the dollar, a loss on exchange of \$175,000,000 will be effected through the use of lignite for power. The importation into Western Canada. There are 57,000,000,000 tons of lignites in Saskatchewan and even a greater quantity of the better grade of this fuel in Alberta. Eventually, too, utilization of valuable by-products will provide raw material for native industries, and in these provinces not so well supplied with water power as the other provinces of the Dominion the vast stores of energy locked up in these lignites will be made available for industrial and agricultural purposes.

One cannot believe that the West with a coal production now greater than that of the Atlantic provinces, will continue to import coal from

Pennsylvania. Alberta alone has 16 per cent of the world's total coal supply. Industries in Winnipeg have discovered that coal from Alberta is a satisfactory substitute for the imported product. It is certain that western coal will also be utilized for domestic purposes.

Experiments in wheat breeding produced Marquis wheat, the staple wheat of the west, and now the research council is trying to discover a variety of wheat which will ripen early, be wholly rust-resistant, and have good milling and baking qualities. A new process of making better wheat out of flax straw in Saskatchewan was recently discovered from which it is believed a great industry will develop and a substantial money saving to western farmers be effected. The research council is seeking to discover a method of utilizing the thousands of tons of waste straw which from year to year are burned in the prairie provinces. The fact that we import iron and steel to the value of \$15,400,000 should stimulate the Canadian steel industry. Ores which have had practically no commercial value 20 years ago are now in high demand. It cannot be over-stated that the minerals in Canada or methods of treatment which will in degree lessen our dependence on foreign supplies. The natural resources branch of the department of the interior has just issued a memorandum on the subject of the production of iron. This is said to be the lightest and strongest that has yet been produced. It is said there are over 100 known sources of iron in the Dominion, and some of which have proved very productive. One mine in 1916-17 produced more than 100,000 tons of iron ore in the world. In 1918 the total production in Canada was 180,000 tons which was one-third of the world's production. It is stated that Canada is in the most favorable position in the empire to supply this metal. In remote northern Manitoba, beyond the Saskatchewan and north of the inland sea of the province, in 1919 copper and gold ores were taken to the value of \$1,007,000. The value of \$69,433, produced by the value of \$163,000 and furs were taken to the value of \$1,007,000. The particular property in this territory is said to contain 200,000 tons of copper ore valued at \$10,000,000.

Some Facts About The Far North

Stefansson Deplores Lack of Knowledge of Canadian People Regarding North

Lamentable ignorance on the part of Canadian people regarding conditions in the far north is due to the teaching on the subject in Canadian schools, according to Vilhjalmur Stefansson, the noted explorer, says the Winnipeg Free Press. These wrong impressions received in childhood are very hard to uproot, he pointed out.

There are 640 different species of flowering plants, and roughly three times as many flowering plants as non-flowering plants in the Arctic country, according to Mr. Stefansson. In the north, he explained, there are two seasons, the winter and the summer of the settled part of Canada.

Just as grass cannot grow here in the winter time, the grass cannot grow in the country around the Arctic circle in the winter. But in the summer time, one can find Kentucky blue grass, which is the most prevalent at the vegetation up there, golden rod, poppies, blue-bells, dandelions, timothy and reedgrass, "and these plants grow as luxuriantly as those of the settled part of Canada."

Mr. Stefansson predicted that the north would be developed in the same way as other countries. He explained that there are rich resources up there, but that the north is not yet developed. "A land is measured by its productivity and not by its climate, and if a land is rich in resources, it is developed irrespective of its climate."

Mr. Stefansson stated that he expects to set forth on his fourth voyage in the Arctic region at a distant date. He is at present engaged on the completion of a book concerning the last five years in the Arctic, between 1913 and 1918, and said that this should be published in the fall.

Canadian Fisheries

People of Canada Should be Educated to Eat More Fish

The fisheries of Canada represent an asset of \$5,000,000 and are capable of enormous development if the people of Canada could be educated to eat more fish, was a statement made by A. H. Brittain, ex-president of the Canadian Fisheries Association and vice-president of the Dominion Fish Corporation, who passed through Winnipeg recently on his way home from the fisheries convention at Vancouver.

Mr. Brittain stated that if Canadians would eat more fish that a considerable stride would have been made in fighting the high cost of living. "Fish," he declared, "is the cheapest food in Canada today and only a small percentage of the population of Canada are consumed in the Dominion. The majority is sent to the United States, South America and West Indies."

Bath Tub Prohibited

Medical Authorities Attacked It As Dangerous to Health

The first bathtub in the United States was installed in Cincinnati on December 20, 1842, by Adam Thompson. It was made of mahogany and lined with sheet lead. At a Christmas party he exhibited and explained it and four guests later took a plunge. The next day the Cincinnati paper described the new invention and it gave rise to a violent controversy. Some papers designated it as an epicurean luxury, others as an undignified and vulgar simplicity in its surroundings. Medical health authorities attacked it as dangerous to health. The controversy reached other cities and is now than one place medical opposition was reflected in legislation. In 1843 the Philadelphia common council considered an ordinance prohibiting bathing between November 1 and March 15, and this ordinance failed by two votes. During the same year the legislature of Virginia laid a tax of \$20 a year on all bath-tubs that might be set up. In Hartford, Conn., an ordinance was passed in 1844, but it was never enforced, and in 1862 it was repealed. In 1863 a bathtub was installed at the White House.

Whenever a large town in the British Isles changes its source of water supply, a sample is taken of the tea-blenders in order that the right blend of tea may be made to suit that peculiar water.

The Decline in Prices

Gradual and General Movement Toward Lower Price Levels

Recent declines in the prices of a few commodities are not to be regarded as isolated instances, but are part of a gradual and general movement that has been under way for a considerable time, the National Board of Commerce in New York says in a discussion of current business conditions.

It has generally been conceded," says the statement, "that prices would ultimately seek a lower level than that maintained during the war and immediately thereafter. Such a decline has always followed the overstimulation of commerce and industry produced by war. Under these circumstances, a downward price movement, if gradual and orderly, is to be welcomed both as an evidence of the return of more orderly conditions and as a factor in accomplishing that return. Such a movement in the prices of basic commodities, however, are likely to be followed by a corresponding loss of sight of the fact that in a number of other commodities a gradual decline has been under way for a considerable time. Recent declines are not to be viewed as isolated instances, but as a part of a gradual and general movement which covers all commodity groups and the degree to which it is affected being determined by conditions in the national and world market for that specific commodity."

Visiting Land in Far North

First Train of Season to Fort McMurray-Curlew Noted

Hunted soldiers, financiers, big game hunters and globe trotters, as well as men prominent in the north, were aboard the first train of the season over the Alberta and Great Waterways railway to Fort McMurray. Among the prominent passengers were making the trip, most of them going right through to the mouth of the Mackenzie River, some to the glacial trough and big game country; George Boucher, of Toronto; H. A. Courty, of Ottawa, Indian agent; and a number of the party members of the Indians of that district and many others. The Northland Echo will meet the train at the end of the week and will at once start on its long trip down the Mackenzie River to the land of the midnight sun.

An Unusual Mine

Extends Three or Four Miles and Produces Fuel of Good Quality

A coal mine which delivers its products in loads that travel over an aerial cable to the hold of a vessel at the wharf, is also a coal mine within the Arctic circle sending out its coal to other zones during the brief summer season when the sea is unfrozen. Such a coal mine is a writer in the World (London), is now being operated by an American company on the island of Spitzbergen, and some 800 shiploads of fuel were exported during the open season of last year.

The mine overlooks Advent Bay, and instead of driving their shafts vertically into the earth the operators have driven them almost horizontally into the side of the mountain, opening up a coal mine that extends three or four miles and produces fuel of good quality by far from the surface. The temperature goes no higher than 42 degrees Fahrenheit, and the prevailing rock makes the walls so firm that on the sides of the mine men can stand support them. Everything used to develop this Arctic coalfield had to be brought from a distance and the building material was shipped by steamers and drawn to the site of the mine by ponies, who transported the material by sledges. It was necessary to blast the frozen ground in preparation for the foundation of the aerial cable-way and its machinery. The mine is situated at a level of 4350 feet from the mine to the pier that has been built for the coal steamers; and the work of the ponies goes on in the winter even when the island is ice bound, and the pier runs out into a field of ice through which no vessel can reach it.

In the far Arctic, summer brings a spell of continuous sun, heat and plenty of insects, and these conditions in ten or twelve weeks, bird life is more plentiful than anywhere else on earth.

Wheat Board Will Be Reorganized and Given Wider Power

In reference to the continuance of the Canadian wheat board for another season, the resolution provided that the governor-in-council may appoint a board to be designated "The Canadian Wheat Board," which shall consist of not more than twelve members, including chairman and vice-chairman.

The board may make enquiries and investigations as it deems necessary to ascertain what supplies of wheat are, or may be, available from time to time, the location and ownership of same, the transportation and elevator facilities available in connection therewith, as well as all conditions connected with the marketing and market prices that can be obtained for the same. For the purpose of any inquiry or investigation held by the board, the board and several members thereof shall have the powers of a commissioner acting under Part I of the Inquiries Act.

In the schedule, the board is given authority similar to that at present enjoyed as regards the sale, storage and transport of wheat, and to sell wheat in order of domestic requirements to purchasers overseas for such prices as may be determined by the board. The board is also given authority to fix maximum prices or margins of profit at which flour and other products may be sold by millers, and to fix standards for such products.

A Salt Mine in Poland
Measures 78 Miles at 1000 Feet Deep

About eight miles from Grawos, that interesting old university town of Poland, a wonderful sight may be seen, and to sell white, clear of domestic requirements to purchasers overseas for such prices as may be determined by the board. The board is also given authority to fix maximum prices or margins of profit at which flour and other products may be sold by millers, and to fix standards for such products.

Growth of Dairy Industry

Saskatchewan Dairy Association Is Out After More Members

Creatory patrons throughout the province are being urged by the secretary treasurer of the Saskatchewan Dairy Association to join the association and also the national dairy council of Canada. In an effort to increase the membership of the Saskatchewan Dairy Association, letters are being sent out all over the province.

The remarkable growth of the dairy industry in the province during the past few years is a matter of record in the government blue books. While there were only 31 creameries in operation in the province in 1917 there were 42 creameries and 26-299 patrons.

It is felt that the progress of dairy production would be much enhanced if all these patrons were enrolled in the provincial and national organizations.

Patrols Effective
The innumerable army of airplanes now sweeping hourly over the great St. Lawrence forest have saved it from the axe. Recently one of them flashed a wireless message which was picked up at two different signal corps stations, and telephoned into the Santa Barbara and Los Angeles forestry offices within two minutes after a 15-acre blaze was first sighted.

It may purchase flour from millers at the same price by the barrel and sell the same flour to Canada and other countries. For the purpose of performing its duties the board may allocate or re-allocate tonnage and distribute cars for rail shipments. The issue of participation certificates and payment of advances is provided for by the resolution, as also is the distribution pro rata after sale of all wheat and deduction of administration expenses.

The board is given power from time to time to appoint an executive committee of not less than three of its members, of whom the chairman will be one, and may assign to such executive committee any duties or powers which it is within the competence of the board.

It is provided that there shall not be provided on any grain exchange or on any stock exchange, or in wheat futures during the time the act based upon these resolutions is in force, except by permission in writing of the board.

Notwithstanding any order-in-council heretofore passed by the board of the Canadian Wheat Board, the board shall not hereafter exercise any power inconsistent with the powers conferred by the Canadian wheat board act as amended.

The proposed act shall continue in force until the day immediately preceding the day of the next session of parliament.

Alberta Coal On Winnipeg Market

Summer Shipment of Coal to Storage Will Be of Continuous Operation of Mines

This summer an attempt on a large scale is to be made to place Alberta coal on the Winnipeg market. The city has been experienced in this market extension work by the lack of storage capacity in Winnipeg, and the unwillingness of the consumers to purchase his coal during the summer, when it could be delivered direct from the shipper of Alberta coal to Winnipeg during the slack season and storing it against the rush period. This will have a two-fold effect. First, it will relieve the traffic congestion of the autumn, when the railways are handling the grain traffic. Secondly, it will prevent the raising of the price during a period when, owing to the absence of a market for the output they were ordinarily compelled to store.

This latter difficulty has had rather a widespread effect, and has militated against the ability of Alberta coal to compete with the coal shipped down the mines for a portion of the year, the overhead charges of the shipping of Alberta coal to Winnipeg during the period during which the mines were operating, thus increasing cost of production to a considerable extent. The unwillingness of the miners also had an unsettling effect, and created difficulty in securing and retaining efficient output.

This new enterprise of "Alberta coal mine operators will be watched with interest, and it is hoped that, with successful operation, the partial dependence of the western cities upon United States coal will be materially relieved.

Sodium Sulphate Deposits

Wealthy American Syndicate Making Bid to Secure Valuable Mine

The rich sodium sulphate deposits located south of Croydon, Sask., which were located some time ago, are now to be extensively developed. An American syndicate, the Croydon Ltd., has applied for incorporation and it is understood that work on the holdings will commence at once. It is stated that New York capitalists are endeavoring to obtain control of these deposits. The property is valued at \$3,000,000. The syndicate has also indicated its intention to erect a refining plant. The deposit is situated in the prairie province of Saskatchewan in the world. Four or five by-products can be obtained by the refining process.

Regina—An automobile club has been organized at Fort Qu'Appelle, in affiliation with the Saskatchewan Automobile League.

The Place to Go Where Fishing Abounds

Alberta Fishing Streams Are to be Restocked by Government

That Alberta streams have the finest fishing from a sportsman's point of view Canada has no peer, as expressed by G. S. Davidson, chief inspector of fisheries for the western provinces and the northwest territories. "It is the policy of the fisheries department," said Mr. Davidson, "to keep all small streams, which are the spawning ground of most of the game fish, for two years, and to make every effort to restock them and bring them to their former standard and to have the assurance of the department of fish culture, that everything possible will be done in the matter of restocking the streams."

"Alberta will soon be the greatest fishing country in Canada," said Mr. Davidson, "and the game fish and lakes are fairly alive with fish. An application is now before the department for the granting of a license to a Canadian sportsman to fish in the fisheries rights in the Athabasca district, which is being looked into. The applicants for the fishing rights state they will catch and consume 70,000 pounds of fish daily to the Canadian markets."

About Potatoes

The man who raises his own potatoes is much surer of having potatoes to eat the coming winter than the man who puts in his afternoon watching the ball games and riding in automobiles.—Ontario Post.

The finest emeralds known are owned by the Rajah of Patiala. He has a turban ornament ten inches long and set with 1,000 emeralds. The lower edge is fringed with large, pear-shaped emeralds, which are almost priceless.

Silver coins have now entirely disappeared from circulation in Germany owing to the extraordinary rise in the price of silver.

THE UNIVERSITY ON WHEELS

Agriculture is the Dominion's premier industry. Back of Canada's progress stands the farmer, and the country's advancement in agriculture is reflected in every phase of the Dominion's activity. The attention of lands, better farming and every progressive move of agriculture is the concern of every resident in Canada no matter what his profession; the railways, the governments, industries and manufacturers, and the consumer public are alike interested. The Federal and Provincial Governments and the railways, with a keen realization of this, have ceaselessly worked for the progress and development of this industry through the establishment of experimental farms, the circulation of literature, and other propaganda matter, and many other methods. They have never ceased to advocate better farming, the scientific study of soils, crops and various land conservation, and all that tends for greater and better production, enrichment of land, and improvement in living and social conditions in rural settlements.

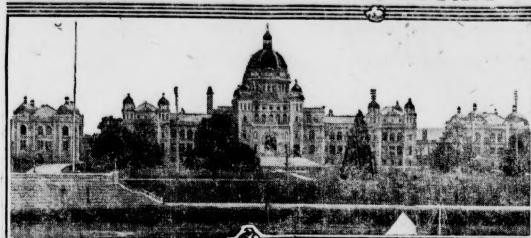

No better system of education and aid to more successful farming has been devised than the "University on Wheels," or as it has come to be popularly termed "The University on Wheels," which journeys through the Prairie Provinces of the West under the auspices of the Provincial Department of Agriculture and Education, and the Canadian Pacific Railway.

It is in truth a travelling university of agriculture, bringing an agricultural course to the farmer's home with its instructive classes and demonstrations of the highest official value.

The trip has two large machinery

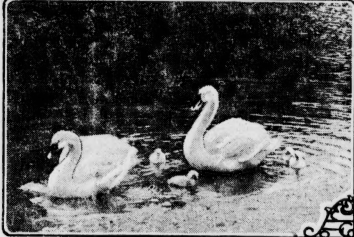

- (1) Boys and Girls attending the Exhibit in the Better Farming Car.
 - (2) A Well-equipped Western Sheep Ranch.
 - (3) Car Fitted Up With Pens for Sheep and Hogs.
- well as those of an educational value. Two coaches are fitted up as lecture cars for men and another for women. A nursery car is provided which contains samples, slides and crabs, in charge of capable nurses, where mothers may leave their children whilst attending lectures.
- The train and entire equipment is furnished free by the Canadian Pacific Railway, which has spared no pains to make the better farming train of the greatest possible service and assistance to Canada's agriculturists.
- Moving picture car films of an interesting character are shown, as

THE CITY OF VICTORIA

Parliament Bldg., Victoria

The charming city of Victoria, on Vancouver Island, the portal to the Pacific, the ocean gateway to the Orient, is one of the most favored spots in the world in beauty of situation, equality of climate and magnificence of scenery. Surrounded by water on three sides, the city is situated in a setting of low-lying wooded hills, in a foreground of the better ranges of the Island Cascades. Across the Georgian Strait, the Olympian range is distinctly visible the crowning glory of the scene being Mount Baker, which lifts its dazzling cone in solitary splendor, to a height of 11,000 feet.

Scene - Beacon Hill Park, Victoria

Victoria is recognized as possessing one of the finest climates in the world. The winters are very mild and the summers cool. In May and June Victoria is especially enchanting with the gardens of roses, beds of laurel, bushes of sweet briar. In the statey groves the air is laden with the pinest odor of the pines.

The city is approached through a channel of wooded islands. On the left stretches the harbor, sheltering craft from all climes. Directly in front, behind a crescent-shaped embankment, the Empress hotel stands out from its surroundings of lawns and gardens. This stately C.P.R. hotel could not better have interpreted the character of the city.

Victoria is the new home-centre for hundreds of English folk, a reminder of the British Isles in Canada. Rockland avenue with its lovely

homes and enclosed gardens, is one of the most picturesque winding driveways in the city.

To the interior, Victoria is the gateway to the land of pleasure, for Vancouver Island is encircled by miles of excellent roads and pleasant scenes. There are many places of interest—the Dominion Experimental farm at Swan Bay, the high explosives works at James Island; the big cement plant at Tod Inlet;

the provincial prison farm; the naval station at Esquimalt; the ethnographical and meteorological observatories, and numerous mountains and lakes. The trip over the Mahabud Mountain is one of the most famous expeditions the tourist can embark upon.

Within easy access to the city are numerous beaches. A pleasant memory picture is the view obtained from the yacht Clubhouse overlooking Esquimalt Bay—O.

JOHN F. MILLER

Alberta's Eye Sight Specialist
of Calgary, 404 Underwood Block

will be at the Wilton Hotel, Claresholm

Wednesday, August 4th

Prepared to make the most scientific examinations and corrections of the eye, for both old and young. Difficult cases a specialty. Having done work in this community for the past ten years is sufficient reference.

Remember the Date. Come early.
Prompt attention given to all repairs

VULCANIZING

All kinds of repair work and retreading done; all work guaranteed. Also baby carriages and go-carts re-tired.

Trout Fishing in Canada

Fishing near St. Marguerite, P.Q.

More benefit is derived from recreation in the open country than from any other form of amusement, and fishing is one of the happiest and most health giving of pastimes. Summer is fishing time, and Canada has numerous lakes and rivers where there is abundance of fish of all varieties to tempt the angler. Trout fishing is amongst the most popular forms of this sport.

To fish successfully for trout his habits must be known. His habits in every part of the country will be different from the habits of his brothers in the lakes and streams of other different sections of the country. The trout loves clear swift running streams, whether large or small, the bottom of which are filled with boulders and gravel. He will hide under the overhanging banks of the streams and under and above fallen trees in deep holes made by these obstructions of the current. It is particularly noticeable that trout do not jump the fast flowing rapids, but in the eddies along the banks. The trout feeds largely on insects, and is a lively forager for food, and he is often seen chasing the mayfly outworn during the middle of the day and now and then leaping in the air for black flies and beetles. He is a keen hunter of worms, and catches

Trout Fishing at Banff

In the white-capped foaming waters below a fall in the stream. Banff, B.C. is the headquarters for trout fishing on the upper Kootenay lake. Harder masters who are visiting Banff may catch excellent trout in the Bow river. Splendid trout fishing may be had at Niagara, Ontario, and in the rivers and lakes among the Laurentian Mountains. Quebec, in fact there is trout fishing to be had in nearly all Canadian waters of any great extent. But those who are seeking a big haul should go to places that are not much frequented.

Clogged Nostrils Open Breathing Made Easy, Catarrh Cured

New Method Very Successful

It is a new method of treatment, that of medicated air, and cannot fail to be beneficial. It goes wherever air can go, thus reaching all the affected parts. It purges the sinuses, simply burning up the disease germs. Catarrh is a non-poisonous and healing agent; it therefore acts upon the mucous tissues of the throat, nasal passages, and bronchial tubes, destroying all microbe life, and at the same time breaks up all the inflamed parts.

As a cure for Catarrh, Bronchitis, Asthma, La Grippe, a strengthening for the throat, Catarrhoeum cannot be equalled.

It is a guaranteed cure, and is highly endorsed by prominent physicians who use Catarrhoeum in their practice.

Sufficient Catarrhoeum for two months' use, price \$1.00 smaller size 50c at all dealers.

Love of The Wild

— BY —
ARCHIE P. McKEISHNIE

Printed by Special Arrangements
with The Review-Advertiser,
Toronto, Ont.

(Continued.)

Far over the pines of the Point another dark bunch would grow into space, and, turning, throw a gleam of white upon the watchers' eyes. These were blue-bills, hardiest of all the wild-ducks. They were tired and unafraid, and ready to make friends with any waterfowl, whether they were of their own kind or a flock of despised coot. Great flocks of peewee canvas-backs, their wings dipping in unison, their white backs gleaming in the morning light, would crowd up and fade away to grow to life again. They would sweep around and around the bay, craning their long necks suspiciously, settling ever lower, and passing many a flock of downy fluffy ducks, that were resting, having fed long before the dawn of day.

Boy would watch these wild, free things with all the joy of a wild sportsman with them. As far as the eye could reach were ducks and brant, and the boy was the wild Point, and above all the wild sky with angry darts of light like ragged knives, mashing its breast here and there.

Naturally Boy resented the advances of anything tending to destroy his pictures of his world.

A big man from civilization, who owned the strip of timber across the creek, had built a mill thereon, and all day long, that mill sang its song of devotion and the water that it drew was growing wilder. It was his own timber the man was cutting, nobody could gather that, but he was destroying, each day, the creek, that silver thread that had been for so long a home for duck and mink and waterfowl. He was destroying beauty and crippling the usefulness of the best trapping and fishing ground of the Bushwackers. Indeed, had he been a villainous villain throughout that wooded fastness. The shillabang song of Halibut's mill was driving the fur-hunters' animals to seek more secluded haunts. The wood-ducks that had nested close in along the wooded shore, drifted far back to another creek, and the black ducks did not flutter lazily along the marsh throughout the breeding season now, but high in the air, and remote from the noise and smelter and that was a new and fearful thing to them.

Boy McTavish hated that mill, and that schoolhouse of white boards clinging to the hill he hated, too. Hatred was a strange element with him. It sickened him, and repulsed him, and robbed him of all his old-time restfulness of spirit. The discord could not pass him by.

CHAPTER V.

Even in this golden, hazy dawn it was with him, as he stood gazing across the creek. The mill, and that schoolhouse of white boards, warmed his cheeks and the heavy scent of over-ripe woods-plants stole to his nostrils like a smothering blanket. But that scar upon which eyes rested had reached his inmost soul, and for him the old gladness of sweet, dewy mornings must hereafter be tinged with a new and strange bitterness.

**Your Granulated Eyelids,
Your Eyes**
Are inflamed by exposure to dust, smoke, and other irritants. They are relieved by **Murine Eye Drops**. Just Eye Comfort. Ask Your Druggist or by mail 50c per bottle. **Murine Eye Drops** are sold by **Murine Eye Drops Co., Chicago.**

From the tall smokestack of Halibut's mill a thin wreath of smoke ascending cut a spiral figure against the fleecy clouds.

Boy turned and walked up the path with his head bowed and his hands deep in his pockets. Behind him trailed the setter, looking neither to the right nor the left. His moods were always under his master's eye. For some reason Boy was sad. Therefore, Joy was sad.

When the path forked Boy turned, and catching sight of the dog's wild face, he threw back his head and laughed. Then he turned, and bending caught the setter about the neck with strong arms.

"Joy," he whispered, "you're an old fool."

The dog submitted to the caress gravely and sat down, looking up into his master's face with deep sympathetic eyes.

Adown through the woods came a voice in rollicking song:

"Massar gone away, de darkey say
"Ho! ho!"

"That's Bill, pop," laughed Boy. "He always sings when he's washin' his breakfast dishes. Come on, let's go over and borrow his pickfork. You and me have got to dig later's today."

A few hundred yards further on they found the slogger. He was clad in Bushwacker's buckskin from head to foot.

"Hello, Boy, how's your man?" he cried as he caught sight of the visitors.

"Just about the same, I guess," Boy answered. "Nobody up when I left, so I can't just say how no spent the night. Want to borrow your fork, Bill?"

"Take it an' anythin' else you see as you'd like," said the slogger. "I ain't much on tea or drink."

Boy yanked Bill and I once he hit the trail back soon, "cause we want to get the taters dug before night."

"All right, as soon as I put these dishes away I'll get you a fork," said the slogger. "You're a good fellow."

"You're a fellow," said the slogger. "You're a fellow," said the slogger. "You're a fellow," said the slogger.

"You're a fellow," said the slogger. "You're a fellow," said the slogger. "You're a fellow," said the slogger.

"You're a fellow," said the slogger. "You're a fellow," said the slogger. "You're a fellow," said the slogger.

"You're a fellow," said the slogger. "You're a fellow," said the slogger. "You're a fellow," said the slogger.

"You're a fellow," said the slogger. "You're a fellow," said the slogger. "You're a fellow," said the slogger.

"You're a fellow," said the slogger. "You're a fellow," said the slogger. "You're a fellow," said the slogger.

"You're a fellow," said the slogger. "You're a fellow," said the slogger. "You're a fellow," said the slogger.

"You're a fellow," said the slogger. "You're a fellow," said the slogger. "You're a fellow," said the slogger.

"You're a fellow," said the slogger. "You're a fellow," said the slogger. "You're a fellow," said the slogger.

"You're a fellow," said the slogger. "You're a fellow," said the slogger. "You're a fellow," said the slogger.

"You're a fellow," said the slogger. "You're a fellow," said the slogger. "You're a fellow," said the slogger.

"You're a fellow," said the slogger. "You're a fellow," said the slogger. "You're a fellow," said the slogger.

"You're a fellow," said the slogger. "You're a fellow," said the slogger. "You're a fellow," said the slogger.

"You're a fellow," said the slogger. "You're a fellow," said the slogger. "You're a fellow," said the slogger.

"You're a fellow," said the slogger. "You're a fellow," said the slogger. "You're a fellow," said the slogger.

"You're a fellow," said the slogger. "You're a fellow," said the slogger. "You're a fellow," said the slogger.

"You're a fellow," said the slogger. "You're a fellow," said the slogger. "You're a fellow," said the slogger.

No Restrictions Against Trade With Russians

Understood That Several Contracts Have Been Made in Canada

Reading from an article in the Montreal Gazette, Joseph Archambault (Chamby Vercheres), asked the government regarding status of trade between Canada and Soviet Russia. He quoted the newspaper as stating that Mr. X. Y. Martens, representative of the Soviet government in the U.S. had said that millions of dollars in contracts for food, machinery and other supplies had been placed between Canada and Soviet Russia. Mr. Archambault asked if trade had been resumed with Russia, was the government aware of these contracts having been made, and was it a fact that Premier Lloyd George and Gregory Kozlov were instrumental in arranging these contracts?

Sir George Foster replied that there were no restrictions against trading with Russians, but Canadians were not given any more facilities than elsewhere. He knew nothing of the proposed negotiations, but officially it had been stated that considerable contracts had been closed between Canadians and Russians.

To Honor the Brave

King Holds A Reception For Three Hundreded and Fifty Victoria Cross Men

King George recently entertained at a garden party 350 men who won the Victoria Cross in campaigns. The men marched to Buckingham Palace from Wellington barracks and were joined a few minutes later by relatives and friends.

The men were arranged in groups according to seniority within their rank and each was then presented to the King. The list of names included many that will live long in British history, from Captain Carpenter of the *Vindictive*, which destroyed Zeppelin and Ostend, down to drivers who saved guns at Le Cateau. Private Lynn, who won the Victoria Cross, the D.C.M., and the Cross of St. George, and who was killed, was represented by his fiancée.

Lightning Rods A Great Protection

Apparatus Should be Examined Frequently for Defects

Warning has been given in an official government document to the owners of premises protected by lightning rods, to examine the apparatus frequently for defects which might render it useless when an emergency arises. Lightning rods have proved an almost absolute protection in cases where they have failed it is usually found that the failure was due to defects in installation or to deterioration, which would have been discovered and repaired by systematic inspection. The most frequent faults are broken insulators, or bends in the cable which allow contact with the framework, or corrosion at the point of entry into the earth. The latter, it is pointed out, is a very important thing. The electricity is carried into the ground by means of the cable, but if the cable corrodes and the ground connection is thereby broken, a fire is very liable to result. The cable should be kept in a sound condition at all times, and be placed deep enough in the ground to always be in damp earth. When building wire fences it is advisable to use ground wires every five rods. Lightning is attracted by wire fencing, and as during a storm animals will congregate near fences, many of them are killed by contact with the wire.—St. Thomas Times-Journal.

Protecting Trees

Winipeg Records Show That 110,000 Trees Have Been Planted

Winipeg has passed special ordinances to protect trees. It is an offence for persons other than authorized officials to tamper with them. Residential sections of Winipeg are covered by the ordinance. Of this number 75,000 are on the streets. The parks board, which has jurisdiction over the boulevards, has planted 25,000 trees along the 120 miles of street so beautified, the total cost for tree planting being \$26,000. Property owners have been made responsible for the planting of 447,000 more trees on the boulevards in front of their residences.

Columbus brought the first male cattle to America on his second voyage.

Economy in Use of Paper

A Matter in the Interests of Economy Which Should Engage Attention

The Nation's Business, a magazine published by the chamber of commerce of the United States, in discussing the paper situation, cries out loudly against extravagance, and argues that the United States government set the pace for the people of the Union along the lines of economy in the use of paper. In this connection, the magazine cites the case of a Helena, Montana, editor who received identical publications from the same department of the government under three separate addresses. The Nation's Business also denounces the practice of using the government printing office for the issue of propaganda for the members of the senate and other departments of the government, quining one senator to the effect that a Kansas business man of his acquaintance in three days received 165 government publications, and calling for a saving of paper by the United States federal authorities.

This waste of white paper is not peculiar to the United States. The franking privileges allowed the members of parliament and senators in Canada, and the accessibility to them of the government printing office, permits them to flood the Canadian mails with printed copies of their own or other politicians' speeches, a majority of the addresses receiving a number of copies of the same publication. This is surely a great waste of white paper, of which there is no serious shortage at the present time.

Here is a matter in the interests of economy which should engage the attention of the federal government. Waste in paper as well as in other lines should be checked. A strong hand is needed to effect this reform.—Hamilton Spectator.

Motorists and Pedestrians

"The time is not far distant," said an elderly citizen of Toronto, on the other day, "I may not live to see it, perhaps, but some of you will, when franking privileges in this city will be forced to wear a red electric bulb in his necktie and carry a red lantern swinging to his coat-tails behind."

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

The name "Bayer" identifies the genuine Aspirin—the Aspirin prescribed by physicians for over nine hundred years and now made in Germany. Always buy an unbroken package of Bayer Tablets of Aspirin, which is the only one.

There is only one Aspirin—Bayer's—You must say "Bayer" Aspirin is the name registered in Canada of the Bayer Manufacturers of Aspirin. Bayer is not a name, it is a mark. Bayer's Aspirin is the only Aspirin that is stamped with their great red cross, the "Bayer Cross."

COUNTER CHECK BOOKS

Provide the only means by which you can keep an absolute accurate check on your sales. The new luxury tax and sales tax makes it necessary to keep such a record. We make sales books suitable for any line of business, with either duplicate or triplicate copies.

TRIPPLICATE BOOKS

There is a heavy demand just now for triplicate books. We make a great variety of triplicate books, both in separate carbon leaf and black back style. Write us (or sample and prices before placing your next order, or ask any of our agents to give you this information.

Vegetable Parchment Butter Wrappers

We are in the best position of any firm in Canada to fill your order promptly for parchment butter wrappers, either printed or plain. We are large importers of this brand of paper, and have special facilities for printing wrappers in either one or two colors of ink.

WAXED PAPERS

We also manufacture a complete line of waxed bread and meat wrappers, plain or printed, waxed paper rolls for home use, and waxed papers for all purposes.

Our equipment is the most modern and complete to be found in Canada. Our goods are first class and our service is prompt. Let us prove this to you on your next order for Counter Check Books, Parchment Paper, or Waxed Paper.

Imperial Polarine Available Everywhere

WHEREVER you tour, throughout the length and breadth of Canada, you can secure the grade of Imperial Polarine you now use for lubrication—exactly the same uniform grades are sold by dealers everywhere from Halifax to Vancouver.

Imperial Polarine reduces your greatest expense—depreciation, yet costs less than storage, tires, repairs or gasoline. It reduces friction to a minimum, maintains a piston-tight seal under heaviest engine heat, helps the engine extract the last ounce of power out of gasoline.

Imperial Polarine holds its body, maintains compression—keeps the motor running smoothly and quietly. The Imperial Chart of Recommendations shows the grade recommended for your car. Ask to see it when you stop for oil.

Imperial Polarine is sold by good dealers everywhere in sealed one-gallon and four-gallon cans, half-barrels and barrels, also in 12½-gallon steel kegs, the handy size for the home garage. Buy the larger sizes to save money.

GRASSES OF CANADIAN PRAIRIES MAKE MOUNTAINS OF BUTTER

ALBERTA
AT CALGARY

CATTLE IN ALBERTA FIELD

Alberta's 1920 contribution to the butter market was a far cry from the 1919 figure of 1,000,000 pounds that put \$1,812,000 into the butter-makers' pockets. The quality of this butter was unquestionable as attested by the fact that Alberta carried off the first three prizes for block butter at the recent National Dairy Council Exhibition held at Winnipeg. Alberta's butter output increased during the past four years almost 40% in volume and over 125% in value. There are 55 co-operative creameries in the province—all community owned and operated, and 13 privately owned and operated. In addition to these there are in the larger

provinces, following close on the heels of grain growing and stock raising. Mixed farming has been strongly advocated to Canadian farmers and they have seen its advantages. Today it is generally practiced. If a crop fails, disaster is not the result, there is always plenty of straw and fodder to insure the weekly cream check for the man with a dairy herd. The progress of the dairying industry has been very much helped by the increased cultivation in irrigated territories. Alberta is the greatest fodder yet discovered for dairy cattle, and is bringing wonderful prosperity to districts such as Cardston and Brooks.

PROVINCE OF ALBERTA

6 PER CENT. GOLD BONDS

Help Your Province

- By purchasing bonds of the Province of Alberta.
- While securing the highest class of investment procurable you at the same time aid your Province to provide for the building of its Public Works and Telephones in the most effective way.
- Financing by the issue of bonds within the Province results in the distribution of the interest amongst our own people.
- If you encourage this idea, you help your Province to become less dependent on outside money markets.
- Interest is payable half-yearly—1st of May and 1st of November—by coupon.
- Bonds are in denominations of \$100, \$500 and \$1,000.
- Remittances should be made by marked cheque, money order, or postal note.

These Bonds may also be obtained from any recognized bond house in Alberta. Write for fuller information to Deputy Provincial Treasurer.

HON. C. R. MITCHELL,
Provincial Treasurer.

W. V. NEWSON, Deputy Provincial Treasurer,
Parliament Buildings, Edmonton, Alberta.

'Kenora' A Summer's Idyll

Regatta Day - Kenora

There are some places which never lose their charm as holiday resorts, and which as the seasons pass attract visitors as a magnet does the needle. Such may be claimed for Kenora and the Lake of the Woods. This lovely spot is within easy access to all, situated as it is on the main line of the Canadian Pacific Railway in the beautiful Province of Ontario.

The Lake of the Woods is a perfect earthly Paradise, thronged in its thousands of islands, most of which are owned by private Canadian citizens who spend their summers there, leaving the simple life.

A splendid way to see the beauties of the Lake of the Woods is to make a day at Kenora, and from there hire a motor launch and go sailing among the islands. The Lake is studded with islands, numbering several thousand, some more than 100 acres in extent, on which are built pretty bungalows and cottages.

Most of the islands are thickly timbered, the trees growing to the water's edge, and in the early summer months water lilies, both golden yellow and white, are found everywhere. Blueberries and other fruit are grown abundantly on most of the islands, hundreds of tons being picked by the Indians and shipped to the different cities for consumption.

Kenora itself is a pretty little town built on the lake front, commanding a splendid view of the lake. It has a large number of stores, a Public Library, a U. S. Post Office, a Tourist Hotel, in the Main Street, and many more.

Kenora, Ont.—Out for a Spin

larger islands run by the Y.M.C.A. and the M.I.A. of Winnipeg, where the tourists can have accommodation at reasonable rates, while on Cones Island there is a fine sandy bathing beach and pavilion for dancing.

Happiness seems to be the dominant note at Kenora and its vicinity, everywhere one meets parties of young people on pleasure boat, teaing, bathing or picnicking, and the stillness of the air is broken only by the laughter of the song of the birds.

The district is much frequented by artists, photographers, and sportsmen, each finding a wide field for his particular bent. The lake is a perfect artist's Paradise, many a trout being landed before break of day to provide breakfast for the campers. Here too in their season are to be found moose and bear, as well as other big game.

Who can ever forget the glorious moonlight on the Lake, the intense stillness broken only by the dip of an oar or the throb of a motor boat, when the shadows deepen on the islands, and "when the moon area her unwinked face reflected" in the blue water? Kenora is redolent of romance, is indeed like a true poem of perfect music where there is no discordant note, and where as each evening closes one can say, we have come to the end of a perfect day.

A few miles out of Kenora are the little towns of Norman and Kewatin, both of which are within walking distance, the road winding on the hillside affords an uninterrupted view of the lake, every bend opening up new lovely spots.

Who can ever forget the glorious moonlight on the Lake, the intense stillness broken only by the dip of an oar or the throb of a motor boat, when the shadows deepen on the islands, and "when the moon area her unwinked face reflected" in the blue water? Kenora is redolent of romance, is indeed like a true poem of perfect music where there is no discordant note, and where as each evening closes one can say, we have come to the end of a perfect day.
